

Heavy Duty Mechanic - Wolverine Mine, Yukon

Yukon Zinc Corporation has an immediate need for an experienced **Heavy Duty Mechanic** at its Wolverine Mine project in the southeast Yukon Territory.

We're building a new team for a new mine with new equipment! Come join us!

Responsibilities

Initially intended to perform a 'bridging' function between installation and commissioning, this position is expected to transition to operations. More specific responsibilities include:

- Coordinate with contractors and vendors during the installation and commissioning of the power generating equipment and ancillary equipment necessary for mine operations.
- Provide leadership and assistance in the training of other operating personnel after commissioning and in the transition to operations.
- Assist in the development of safe work and operating procedures for rolling stock and stationary surface equipment.
- Perform on-going mechanical maintenance functions as a member of the Surface Operations group.
- Provide assistance to plant and underground maintenance personnel, as may be required.

Requirements

- Trade qualification as a Heavy Duty Equipment Mechanic (Technician). Interprovincial (Red Seal) certification preferred.
- Minimum 3-years experience in industrial maintenance and rebuilds of diesel engines, in particular those used in power generators (Caterpillar).
- Surface (diesel and gasoline) and underground mobile equipment maintenance experience is also important.
- Excellent work ethics and demonstrated record of safety leadership.
- Proficient in Word, Excel, Email.
- Remote camp (northern climate) experience preferable.

Wolverine is a fly-in/fly-out underground mine operation that will produce on average 1,700 tonnes per day run-of-mine feed when it goes into production, scheduled for the third quarter of 2010. The minesite is located almost midway between Ross River and Watson Lake on the Robert Campbell Highway and is approximately 250 km by air northeast of Whitehorse.

This position will be on a rotational work schedule of 2 weeks in x 2 weeks out.

Interested and qualified candidates should send their resume via email to careers@yukonzinc.com, or by fax at 604-682-5404 by February 12, 2010. We thank all applicants for their interest, however, only those shortlisted will be contacted.

(Onsite personnel wishing to apply may submit their resumes directly to the site administration office.)
