

## Geotechnical Engineer Wolverine Mine, Yukon

Yukon Zinc Corporation has an immediate need for an experienced “hands-on” Geotechnical Engineer at its Wolverine Mine Project in the southeast Yukon Territory.

### Make Wolverine Mine your next career choice!

- ✓ *A commitment to values: Safety, Integrity, Respect, Accountability, Prosperity, Collaboration*
- ✓ *Charter flights direct to site from Whitehorse, Vancouver and Prince George...currently with pick up points in Campbell River, Smithers, Terrace, Watson Lake and Ross River.*
- ✓ *Company supported travel from your nearest airport to the charter's pick up point*

### Responsibilities

Reporting to the Technical Services Superintendent, the Geotechnical Engineer will play a key role in the safe operations of the underground mine. More specific responsibilities include:

- Exercise leadership in the implementation and continued updating of the mine's ground control management plan
- Plan and direct ground support activities, including bolting patterns and shotcrete, for all types of ground conditions in the mine
- Conduct appropriate testing and analysis of ground support in place
- Develop and maintain ground support policies and procedures for mine operations
- Provide input to short and long range mine planning
- Develop blasting patterns and test different blasting products to reduce collateral damage
- Assist with understanding and projecting operating costs

### Requirements

- Geotechnical Engineering degree-or a Mining or Geology degree, specializing in 'rock mechanics'
- 5 years practical and related experience in underground mining operations
- Willingness and ability to communicate effectively with miners and other underground personnel to anchor new concepts and procedures
- Demonstrated record of safety leadership
- Experience in development of a new underground mine operation will be an asset
- Excellent written and verbal communication skills
- Remote camp (northern climate) experience preferable
- Able to work a rotational schedule of 2 weeks in x 2 weeks out
- Consent to a pre-employment medical examination which includes a drug & alcohol screening

Wolverine is a “dry camp”, fly-in/fly-out underground mine operation. The mine site is located midway between Ross River and Watson Lake on the Robert Campbell Highway and is approximately 280 km by air northeast of Whitehorse.

Interested and qualified candidates should send their resume via email to [careers@yukonzinc.com](mailto:careers@yukonzinc.com), or by fax, toll-free, at (866) 887-7517. We thank all applicants for their interest; however, we are only able to contact those who have been shortlisted.
